RE: Cleaning Gymnastics Clubs,

To all our Friends and Customers,

We have been receiving some questions regarding TRUCE cleaner and it's effectiveness against COVID-19. We want to be very clear as to where we Spieth Canada stands regarding TRUCE cleaner and chalk remover. **TRUCE cleaner is not at this time proven to disinfect against COVID-19.**

TRUCE cleaner is in the process of being tested by the EPA in the USA and the time frame for this is as of yet unknown. They are on a list but with everything going on in the world it is taking longer than TRUCE would like.

There are lots of good disinfectants available and we still suggest checking the CDC and WHO for the best product and method to help defend against COVID-19. We suggest using a product that is as green as possible.

Spieth Canada is recommending Truce cleaner as a long term cleaner based on it's cleaning ability and the fact it's non-toxic. Truce cleaner and chalk remover have been proven to work with all mats and apparatus we produce with the exception of the very old beam and vault covers.

We can offer TRUCE cleaner globally and ship it safely to our customers around the world and these reasons are why we are promoting it.

We at Spieth Canada hope this is a helpful addition for our friends and customers moving forward, but for a disinfectant capable of dealing with specific viruses we recommend visiting the CDC and WHO websites.

<https://www.who.int>

<https://www.cdc.gov>

All the best

Your Spieth Canada Team
